Other Assessment observations and comments:

Exceptional Observations:

General Comments:

Re-inspection due to structure fire at facility February 2023. Fire localized to auditorium area, cafeteria located significant distance from affected area.

-All food-contact surfaces washed/rinsed/sanitized previous day. Director of Food & Nutrition (KS) advised that professional restoration/cleaning company sanitized larger pieces of equipment including ovens, soup kettles, etc.

-All refrigeration units measured below 41F.

-No pest activity observed during inspection. Due to multiple doors in close proximity to cafeteria being propped open for extended periods of time, it is recommended to have pest control on-site prior to restocking facility with food and single service articles. Monitoring devices such as glueboards must be applied.

Facility may re-open when ready.
